Subject: Editor Error Report - Laidlaw, Wichita

I have completed gathering information for the corrections to the reference 1997 HW Report.

On the GM Forms (14) that show an EPA ID# as 'A220106'; change the EPA ID number to ' FCCANADA'. This means that the hazardous waste was shipped out of the country. This entry can be found on page 17 of the instruction booklet.

On the GM Forms (3) that show 'REJ. TO GEN', DELETE that site from the report. It is a 'dummy' site setup internally by the generator.

On WR Forms (2) where EPA ID number is 'C0000912105', change to 'CO000912105'.

On WR Form (1) where waste codes are 'U365, U385, U386, U390, U391, U392', move them to comments section as comment, not as waste code. These waste codes are not in the 1997 instruction booklet.

On GM Forms (2) where waste codes are 'U365, U385, U386, U390, U391, U392', move them to the comments section as a comment, not as a waste code. These waste codes are not in the 1997 instruction booklet.

All of these changes have been discussed with the generator. I have his concurrence to execute the changes.

If you have any questions, please let me know.
